

V.A.C.® Therapy prescription and authorization in one simple step with WoundExpert®

Net Health and KCI have collaborated to seamlessly integrate the KCI V.A.C.® Therapy Order Form within WoundExpert and provide this new feature to all WoundExpert clients for free.

By incorporating the KCI V.A.C.® Therapy Order Form, the WoundExpert software will pre-populate existing documentation to the form—including patient demographics, wound measurements, and insurance information—eliminating the need for the user to re-enter data or transcribe manually by pen and paper.

Once completed, the WoundExpert software will automatically check for documentation compliance and missing fields, providing the ability to update any omitted data prior to submission. After this automatic quality assurance review, the forms will be electronically sent to KCI for authorization and processing. Each authorization is saved as part of the patient's electronic documentation.

Benefits of this solution include:

- Seamless creation of the KCI V.A.C.® Therapy Order Form, pre-populated with WoundExpert data
- Automatic error checking for form compliance
- Inclusion of electronic signatures on the KCI V.A.C.® Therapy Order Form
- Direct transmission for approval from WoundExpert to KCI
- Integration with WoundExpert's electronic documentation

For more information on this free new feature, please contact WoundExpert Client Services at 800.411.6281, option 2, refer to information in the WoundExpert Help menu, or send us feedback (feedback@woundexpert.com). Alternatively, please contact the KCI Express® Support team at 800.275.4524 x65080 (M-F, 7 AM to 6 PM, CST).
