

V.A.C. Ultra™ Therapy System is compatible with a variety of topical solutions for use with a variety of open wounds.

Topical Wound Solutions

The following topical solutions are compatible with V.A.C. VeraFlo™ Therapy.*

Generic Solution Class	Trade Name	Considerations for Use with V.A.C. VeraFlo™ Therapy
Hypochlorite based solutions (e.g. Hypochlorous acid, Sodium hypochlorite)	Dakin's Solution (quarter strength), Dermacyn®, Microcyn®	<ul style="list-style-type: none"> Dakin's Solution should not be used in concentrations greater than 0.125% (quarter strength). Consider using the fewest irrigation cycles and minimizing hold times to the lowest level that is clinically relevant.
Silver nitrate (.5%)	Various	Silver nitrate is light sensitive. Protect V.A.C. VeraLink™ Instillation Tubing from light during use of silver nitrate.
Sulfur-based solutions (sulfonamides)	Mafenide acetate, Sulfamylon®	Refer to manufacturer's labeling for solution-specific considerations. No device related considerations for use with V.A.C. VeraFlo™ Therapy.

*Based on KCI in-house testing of disposables mechanical properties, biocompatibility, and solution interaction. Listing of specific solutions is not an endorsement of or indication of a solution's clinical efficacy. If wound healing goals are not being achieved, consider an alternate instillation frequency, solution concentration, or solution type deemed appropriate by a physician.

For more information on the benefits of V.A.C. VeraFlo™ Therapy, contact your KCI Representative.

NOTE: Specific indications, contraindications, warnings, precautions and safety information exist for KCI products and therapies. Please consult a physician and product instructions for use prior to application. Rx only.

Consult manufacturer's labeling for specific details. V.A.C. Ultra™ Therapy System is indicated for use only with topical wound solutions.
