KCI Active Healing Solutions

KCI V.A.C.® Therapy & Allscripts®
Discharge Planning Integration

Simplify KCI V.A.C.® Therapy Orders

KCI and Allscripts have partnered to offer an interface that provides Allscripts Discharge Planning (DP) users access to the KCI V.A.C.® Therapy insurance authorization form (VTIAF) within the Allscripts application. This integration will help Allscripts DP users electronically complete and submit V.A.C.® Therapy discharge orders seamlessly to KCI, while saving time and reducing handwritten errors.

Many data fields in the V.A.C.® Therapy referral document are automatically mapped from Allscripts DP, eliminating the need to re-enter some of the existing data. Depending on preferences, organizations will be able to customize the data fields that will be populated within the V.A.C.® Therapy authorization form.

BENEFITS INCLUDE:

> Automating data entry allows your department to focus on other important tasks

> Providing the use of a single system (Allscripts DP) to process KCI orders as well as non-KCI orders

> KCI and Allscripts will coordinate the update of revisions to KCI's V.A.C.® authorization form ensuring users have the correct version

> Providing Allscript users the ability to participate in KCI's V.A.C.® Ready Care™ program

> Leverage Allscripts' capabilities such as Fax-attach and Print-attach to submit additional clinical information from your facility's EHR with the KCI V.A.C.® Therapy authorization form

The Allscripts and KCI integration allows your organization to submit electronic KCI V.A.C.® Therapy referrals seamlessly from the Allscripts Discharge Planning application.

Features

> Creates a cleaner, more complete referral that is easier to process

> Make easy, quick revisions and save as PDF for future reviews

> Easily submit Ready Care™ orders electronically from Allscripts DP
